All-In-One 8.1pH Prespray SOLUTION

- Better, Faster, Easier, & Healthier
- Superior Cleaner & Degreaser
- Perfect for Greasy Restaurants & Commercial carpet
- Mill Approved for Stain Resistant Fibers
- Indefinite Shelf Life, Freeze Thaw Stable
- Will Not Leave Sticky Residue
- No Acid Rinse Needed
- Encapsulation and/or Extraction
- No VOC's, 100% Odorless
- Non Allergenic, No Solvents, 100% Non-Toxic
- Safe, Neutral pH 8.1 RTU
- Safe on all fibers (test first)
- No Foam, No Soap, No sticking residue.
- **NOT NEEDED:** Final Acid Rinse, Emulsifiers, Degreasers, Boosters, Spotters, Defoamers, Anti-wicking agents, Color stabilizers, Anti-resoling agents.

Carpet Details is formulated using a proprietary blend of the highest quality, purest natural minerals from exclusive U.S. mines. It is processed and stored using proprietary methods to assure top cleaning power on all flooring surfaces without using pH levels higher than 8.5pH RTU. Carpet Details contains a Raw blend of 100% U.S. Minerals, No Fillers, No heat-activating required, No Polymers, No Enzymes, No added Fragrances or Dyes, and no added Unnatural Degreasers or Surfactants. It leaves no soap or sticky polymer residue, and whatever is not fully extracted, continues to encapsulate dirt and keeps cleaning.

Carpet Details has been providing custom labeled spotters to the finest flooring retailers in America for over 20 years. Flooring retailers and consumers trust it, and prefer those professional cleaners who use it as their main cleaner.

(2, 5, 25, or 45lb containers @ 26 powder ounces per pound)

Always pretest in an area for color fastness. ALWAYS slowly pour powder INTO the water. (2 ounce scoop is provided)

Carpet: 2 scoops (4 ounces) per Gallon

In-Line Sprayer: For easier mixing, meter at 1:4 ratio (remove 1:8 yellow tip) and use 6 scoops (12 ounces) per 5 quart container. Otherwise, if using 1:8 yellow tip, use 12 scoops (24 ounces) per 5 quart container.

- 1) Slowly pour powder INTO water (hot water helps it dissolve faster). Shake if necessary to dissolve.
- 2) Pre-spray evenly on carpet paying particular attention to heavy traffic areas, stains, grease, etc. Spray at a rate of about 1 gallon per 300 sq/ft.
- 3) Best to agitate with rake, bonnet, crb, etc.
- 4) Let dwell 5 to 10 minutes (its ok if it dries before extraction).
- 5) Extract with plain cold or hot water through wand. It is not required to extract 100% since whatever is left will continue to encapsulate and clean.
- 6) No acid/neutralizing rinse required.

Upholstery: 1 scoop (2 ounces) per Gallon

- 1) Slowly pour powder INTO water (hot water helps it dissolve faster). Shake if necessary to dissolve.
- 2) Spray lightly directly onto upholstery or onto a towel.
- 3) Agitate with soft bristle brush or clean towel.
- 4) No extraction required.

Tile: 2 scoops (4 ounces) per Gallon

- 1) Slowly pour powder INTO water (hot water helps it dissolve faster). Shake if necessary to dissolve.
- 2) Spray/apply onto floor.
- 3) Let dwell for at least 5 to 10 minutes (it is okay if it dries before cleaning off).
- 4) Re-wet with water as you scrub and extract with mop, spinner, wet/dry, hose rinse, etc.

Concrete: 2 scoops (4 ounces) per Gallon

- 1) Slowly pour powder INTO water (hot water helps it dissolve faster). Shake if necessary to dissolve.
- 2) Spray/apply onto floor.
- 3) Let dwell for at least 5 to 10 minutes or as long as possible for deep grease issues.
- 4) Re-wet with water as you scrub and rinse off.

Spotter: 5 scoops (10 ounces) per Gallon

- 1) Slowly pour powder INTO water (hot water helps it dissolve faster). Shake if necessary to dissolve.
- 2) Apply an ample amount directly on the spot, stain, etc.
- 3) Agitate in.
- 4) Let dwell for 1 minute.
- 5) Blot off.
- 6) Repeat if necessary.

Encapsulation & Low Moisture: 2 scoops (4 ounces) per Gallon

Bonnet and OP (Oscillating Pad) cleaning:

- 1) Pre-spray evenly on carpet paying particular attention to heavy traffic areas, stains, grease, etc. Spray at a rate of about 1 gallon per 300 sq/ft.
- 2) Let dwell 10 minutes on greasy areas and high traffic areas.
- 3) Agitate product into the carpet while lightly rewetting carpet using damp bonnet pads (using a solution tank on floor machine with clean water increases speed dramatically).
- 4) Use multiple pads to pad out grease areas.

CRB machines with NO solution tank (Brush Pro, etc):

- 1) Pre-spray evenly on carpet paying particular attention to heavy traffic areas, stains, grease, etc. Spray at a rate of about 1 gallon per 300 sq/ft.
- 2) While carpet is still damp, agitate product into the fibers with CRB machine.

Machines WITH solution tanks (Cimex, Multiwash, etc)

- 1) Apply evenly on carpet through machine's system paying particular attention to heavy traffic areas, stains, grease, etc.
- 2) Apply at a rate of about 1 gallon per 300 sq/ft.
- 3) Run clean water or rinse through machine solution tank when finishes.

Manufactured by FDC Systems LLC

ALWAYS WATER FIRST THEN ADD POWDER
